Introducing
Tyco Integrated
Fire & Security
Our Promise
We advance safety and security by finding smarter ways to save lives, improve businesses and protect where people live and work.

Andy Ellis
President, Tyco Fire and Security Pacific

About Tyco
Tyco is the world’s largest pure-play fire and security company. Tyco provides more than three million customers around the globe with the latest fire protection and security products and services.

A US$10+ billion company, Tyco has more than 56,000 employees in more than 1,000 locations across 50 countries, serving some of the world’s most demanding environments including banking and financial services, oil and gas, marine, government, healthcare, retail, home security, transportation, commercial and industrial.

Our Values
At Tyco, we are committed to doing the right thing in all aspects of our business. This requires that all of us, every day, exhibit an unwavering dedication to the highest ethical standards. We expect every employee to promote a culture of trust and honesty in all business dealings. We all share responsibility for the proper conduct and resulting success of our company.

Integrity | Excellence | Teamwork | Accountability

Our Commitment To Zero Harm
We are committed to providing products and services to customers in a safe, responsible manner that respects the health and safety of our employees, the environment, our customers, shareholders and the communities in which we operate.
Residential Security
As a leading provider of monitored home security and home automation solutions, we provide homeowners a system to suit their specific needs, application and budget, giving peace of mind and lifestyle management. Our 24/7 monitoring means customers are connected to our Security Response Centre for 24 hour intruder alarm, smoke, panic/duress and personal emergency monitoring.

Commercial Security
At ADT Security, we provide monitored security alarms, video surveillance, access control, wireless network solutions, fire monitoring and more for all types of business premises including hospitals, banks, airports and educational establishments.

Our highly trained and fully licensed staff are experienced at designing, installing, monitoring, servicing and maintaining seamless security solutions - from small stand-alone systems through to multinational, networked systems for multiple sites and hundreds of personnel.

// Our Security Solutions

// Alarm Monitoring
Through our Grade A1 Security Response Centre we monitor alarms 24 hours a day, every day, responding to a variety of situations from break and entry to panic alarm alerts. The Security Response Centre has set benchmarks in the industry for monitoring system integrity, alarm response times and the integrity of the facility itself. In the event of significant power failure, natural disaster or targeted attack, operations continue without disruption.

// Intrusion Detection
Intrusion detection and control systems, including burglar alarms, help protect your business from unauthorised entry. Intrusion detection benefits include:
- Helping protect your business from robbery and theft.
- Giving your people peace of mind with options such as hold-up and duress buttons, motion sensors and window and door protection.
- Identifying critical conditions such as extreme temperatures or flooding.
- Alerting security management and authorities quickly in alarm or duress situations.
- Making changes easily and quickly in remote arming, disarming and other minor programming alterations.

// Home Automation
Our ADT Home Automation is the lifestyle management system that allows you to be in control of your home remotely, from your smart phone, tablet or computer. It allows for you to remotely arm or disarm your system and even unlock your front door remotely from your device.

// CCTV and Video Surveillance
Video surveillance and digital recording are an effective way for businesses to monitor areas of risk 24 hours a day, seven days a week. Benefits of video surveillance include:
- Monitor specific areas of your business, offering additional employee management potential as well as safety and security benefits.
- Record and review digital footage which may be used as admissible evidence, or in evaluating other risks such as drugs in the workplace, workplace violence, harassment, productivity issues or customer service.
- Integrate with other security technologies such as access control for additional capabilities.
- Monitor your operations via ADT managed services, for cost-effective surveillance that allows your company to focus more resources on its core business.

// Access Control
Access control technology helps better deter theft and document events related to the comings and goings of people. Benefits of access control include:
- Track and allow or deter access throughout the facility.
- Provide auditing and time-and-attendance features.
- Restrict access to sensitive areas.
- Provide a safer working environment.
- Avoid expensive re-keying when an employee leaves the organisation.
- Remotely administer and control access to thousands of facilities through one interface.

// Electronic Article Surveillance (EAS)
EAS can help control retail shrinkage and improve profitability. Our exclusive Sensormatic® portfolio and products provides the industry’s highest detection rates of security tags and labels – and its lowest rate of false alarms. Using Tyco’s TrueVUE Retail Platform, we help retailers analyse store performance data and gain enhanced visibility into what’s happening in their stores. This helps strengthen operations, improve profitability, gain competitive advantage and enhance overall customer experience all utilising data that is gathered in real-time from sensors located throughout the store using EAS, item level Radio-Frequency Identification (RFID), video cameras, traffic counting devices, intrusion detection, and more.

// Patrol Response
ADT can and does supply security manpower, both guard and patrol services on an ad-hoc or permanent, depending on our customers’ needs. All guards are licenced in accordance with relevant state licencing authorities and openly display the licence on their person at all times. Security guards also adhere to premises Occupational Health and Safety principles and policies.

// Maintenance and Service
Security systems stand or fall depending on how they perform each day. That is why we work to scheduled and controlled maintenance plans to match any clients requirements.

// Visitor Management System (VMS)
Visitor Management (VM) is a feature delivering extensive pre-registration and reception-based visitor management functions. Optional visitor self-registration capability is available using the VM Self-Registration Kiosk. The Kiosk integrates seamlessly with the VM workstation, allowing sites to share host, visit and visitor configuration so that visitors arriving on-site can be managed from either a reception workstation or a Kiosk. Hosts can manage their visitors onto and off-site from the Kiosk, and visitors who are overdue to leave are automatically notified for follow-up.
Our Market Leading Fire Brands

**Wormald**
Since 1889, Wormald® has been helping protect people and property with a comprehensive range of total fire protection solutions. Wormald’s dedicated teams’ expertise includes design, installation, commissioning, inspections, compliance and testing, maintenance and fire safety training.

With national coverage, and offering 24 hour/7 days a week service, Wormald is able to offer fire protection to a wide range of industries including mining, oil and gas, education, retail, transport and logistics, to name a few.

www.wormald.com.au

**GAAM**
GAAM® Emergency Products provides specialised equipment to the emergency services and industries operating in demanding environments. Specialising in pumps, nozzles, hoses and couplings for urban and rural fire fighting, GAAM provides emergency services with rescue and protective equipment, including fire helmets, forced entry tools, hydraulic cutting gear, thermal imaging cameras, vehicle lights and sirens.

www.gaam.com.au

**Exelgard**
Exelgard® supplies fire protection products to fire companies, wholesalers, distributors, government departments and retailers. Exelgard’s range includes fire extinguishers, fire blankets, domestic smoke alarms, fire hoses and hose reels, couplings, nozzles and safety signage.

www.exelgard.com.au

**Simplex**
Simplex® Time Solutions has been synonymous with industrial time recorders since 1894, the year E.G. Watkins patented his first time clock. The brand continued on an upward path, providing the world with the most technologically advanced products for time, fire alarm, and monitor-control equipment. Today Simplex Time Solutions continues providing quality time recorders and cards, software solutions, master clock systems and time displays throughout Australia.

www.simplex.com.au

**NFS**
NFS has grown to be one of the largest and most respected providers of fire protection installations, products and services with offices nationally. NFS provides innovative fire protection solutions with cutting edge technology backed by technical excellence and a company wide commitment to personal customer service.

NFS use FireTraX which is an integrated maintenance management system which ensures that the maintenance of fire protection equipment is carried out according to contracted arrangements and the relevant Australian Standards. NFS provide fire products and solutions for retail, commercial, mining, government, industrial, aged care, public spaces, manufacturing and education industries.

www.natfire.com.au
// Our Fire Solutions

// Portable Fire Equipment
A functioning and accessible fire extinguisher or fire hose reel in competent hands, can mean the difference between an easily contained minor incident and a full scale fire with all its associated damage and disruption. Equipment such as portable fire extinguishers, fire hose reels and fire blankets that form the first line of defence against a fire.

// Fire Safety Training
We provide real solutions to people and organisations confronted with emergency situations. We know that one of our most important services is emergency response training; because the impact of a crisis can be substantially reduced when people are trained to respond appropriately to it. We offer a range of fire safety and emergency training courses, to provide staff with the skills and confidence to make the right decision and act quickly in the event of a workplace fire.

// Sprinkler Systems
Automatic fire sprinkler systems are widely regarded as the most effective method of controlling fires caused by a broad range of hazards. Sprinkler systems can automatically detect and control the fire. This can be the difference between a minor accident and a major business shutdown.

// Vehicle Fire Suppression Systems
When you combine heat, flammable liquids (under pressure), turbo chargers, exhaust pipes, electrical components and brakes components in the enclosed space of an engine compartment, the potential risk of a fast and furious fire is high. We offer a comprehensive range of VFSS to help defend against the threat of vehicle fire from large mining and quarrying plant and equipment to small forklifts and 4WDs.

// Life Safety & Rescue Solutions
We offer a range of life safety and rescue equipment to fire fighters, law enforcement personnel, military, oil and gas facilities, mining and utilities.

// Alarm and Evacuation Systems
We design and install fire alarm and detection systems, fire indicator panels and Emergency Warning and Intercommunication Systems (EWIS ) that range from simple cost-effective systems through to large automated commercial or industrial solutions. We also offer an extensive range of components and accessories to help complement your alarm and evacuation panels, including, detectors, audible and visual warning ancillaries and additional optional extras.

// Service and Maintenance
Fire protection systems require regular servicing to facilitate optimum performance in the event of a fire. Our service teams can regularly test and audit your systems to ensure they adhere rigorously to the applicable Australian Standards. Our technicians are on 24-hour standby, ready to undertake emergency repairs to your fire protection systems and products. Our dedicated 24/7 national call centre ensures that an appropriately skilled technician is allocated to your job.

// Passive Fire Protection
Fire can occur almost anywhere in any kind of facility. The key to minimising the risk is to prevent fires starting in the first place, and stop them spreading. Combining fire doors and other fire rated products. These passive fire systems minimise the spread of flames, dangerous gases and smoke throughout your facility. Our passive solutions comply with relevant Australian Standards.

// Marine Solutions
Our marine solutions include fire protection, electronic security, life safety and communication systems and services.

// Residential Fire Protection Solutions
Whether it is for around your home, boat, garage, car or caravan, we offer a complete range of residential fire products. Our comprehensive product range includes portable fire extinguishers, smoke alarms, fire blankets and home safety kits.

// Emergency and Exit Lighting
We design, install, test and maintain your emergency exit and lighting systems to current Australian Standards. Our range of LED and cold cathode exit lights offer low energy use, instant lighting with excellent durability and reliability.
Global strength. Local expertise.

At your service.
